SpectoGard
(spectinomycin sulfate)

Sterile Solution

TRIPLE THREAT TREATMENT

Mh

Mannheimia haemolytica

Pm

Pasturella multocida

Hs

Histophilus somni

A TRIPLE THREAT TREATMENT AGAINST 3 KEY BACTERIAL CONTRIBUTORS TO BRD (BOVINE RESPIRATORY DISEASE).

*The first and only FDA approved bioequivalent to the pioneer product Adspec®**

DOSAGE & ADMINISTRATION:

Administer to cattle at a daily dose of 4.5 to 6.8 mL per 100 lb body weight (10 to 15 mg spectinomycin per kg of body weight). Treatment should be administered at 24-hour intervals for 3 to 5 consecutive days.

Inject subcutaneously (SQ) in the neck.

Selection of dose and duration of treatment should be based on an assessment of the severity of disease, pathogen susceptibility, and clinical response. Do not inject more than 50 mL per injection site.

WITHDRAWAL TIME:

11-day meat withdrawal

WARNINGS:

Do not use in calves to be processed for veal or dairy cattle 20 months of age or older.

Caution: Federal law restricts this drug to use by or on the order of a licensed veterinarian. Approved by FDA under ANADA # 200-694.
